*I WANT
TO MARRY
WHAT SHOULD
I KNOW?*

Do you have a question about how to prepare for marriage life? You got covered!

Young people planning to marry have to know a myriad of things before they embark on this adventurous journey.

For instance, they need to know how to choose the right partner; if they have to share their family secrets with their partner and what they should do and what they should not do during courtship.

Would parenting or how their partner was brought up affect their marriage? Can they marry an older partner? If one partner did something that offended the other during courtship, what should the other do? Would a man marry the lady he impregnated or the one he likes? Is there anything wrong dating relatives? Would they date a partner with kids? Is sex and cohabiting before marriage okay?

These and many other questions will be answered exhaustively in this book.
