CALENDAR FACSIMILES

FROM MP 449 B.S.E. TO MP 588 B.S.E
(*circa* A1965 C.E. TO A2104 C.E.)

Forget about the Mayan Calendar and the end of the world that was suppose to happen in 2012 C.E. In this project I have introduced a exciting and original work that may prove to be the most astonishing, far-reaching and creative work of calendrical science with its philosophic, episcological, mathematical and technical foundations grounded in the experience of the Nu African People within the crucible of American grand-domestication (i.e. slavery, Jim Crow/Zip Coon, indirect rule, racialism, discrimination, and murder under the color of law). Despite the hype about the supposed end of the world in 2012 (based on the end-date of the Mayan Calendar) and auto-apocalypse (still to come!); the Nu African Calendar extends that time into the 22nd Century, that is, to 2104 C.E., in a note of optimism, based on the fact that Jesus declared: *But of that day or hour no one knows, not even the angels in heaven, nor the Son, but the Father alone*" (Mark 13:32, NAS). To that end I have created the first modern black civil numeric perpetual calendar since the invention of the ancient Ta-Merry [Egyptian] Calendar whose base year is 4236 B.C.E. The ancient Ta-Merry Calendar was the first every civil-numeric calendar used by man. The ancient Ta-Merry Calendar had its development rooted in the history, episcology, and experiential needs of the black people living in the Nile Valley. Likewise, the Nu African Calendar is rooted in the episcology and experiential phenomena, grounded in the history, experience, and needs of the Nu African (i.e. African-American) People in the American Hemisphere. Below the reader is provided with a comprehensive series of interlinear Nu African Calendars (from 1965 to 2104 C.E.) that have the Gregorian Calendar, Ta-Merry Calendar, and Ethiopian Calendar acronymically keyed to it. Further the reader will see that the base year of the Nu African Calendar is February 21, 1965 C.E. (reflecting the date-point of Shuhadi Malcolm X's martyrdom on February 21, 1965). Although we wanted to begin these calendars at year A1954 (the end of legal segregation in the South) logically since this *Nu African Calendar* is a memorial to *Shuhadi Malcolm X* and the base year is *based around his assassination* February 21, 1965; these calendars will begin *around about* c. 1964 *leap year sequence* inclusive of events in 1965 and the brief *Year Period* and beyond ending with A2104 C.E. For Nu African Calendars from 1860 to the leap year sequence inclusive of the year 1965, the year of Malcolm's assassination the reader is invited to read my project work *Our Ancestors Have Names*. Finally the reader will see the unique way the Nu African Calendar has incorporated the black national holiday of Kwanzaa into its calendrical apparatus falling precisely on the date points this Nu African holiday is generally celebrated. It is hoped the reader will enjoy the unique experience that this project and work offers to those interested in the episcological and experiential phenomena of the Nu African People as given unique expression in this modern black calendrical system. ¹⁸²⁶ There are only 13 months in the *Ethiopian Calendar* (EC) and just like the *Egyptian Calendar* it has a short 13th month of 5 or 6 days. *Pagumen* and *Quaggimi* represent the same short month in the *Ethiopian Calendar*. You will find that some modern *Ethiopian Calendars* use either *Pagumen* or *Quaggimi* as the short month days in the 13th month. This can be confusing. In the calendars below *Pagumen* will be used for the 5 day short month and *Quaggimi* will be used for the 6 day short month in each EC calendar common year that comes just prior to a Gregorian Leap Year. In the *Na African Calendar* this will occur in the Month of *Unusu*. We have marked *Unusu* with a different month of color to represent this calendrical nuance. See *Excerpts 6* for a fuller explanation of the *Ethiopian Calendar*.
